EFG Eurobank Securities Offices

Client: Eurobank Investment Bank

Architectural construction design for the renovation of a 6,000 m2 office building built in the 1960s. The project involved the total demolition of all the interiors and the facade of the building, the reinforcement of the concrete structure and the new layout of all interior spaces.
(Architectural outline and final design by S. Asser, N. Efraimoglou, M. Beraha).

The building includes the following:
- Public facilities
- Brokers offices
- Meeting rooms
- Conference Hall
- Underground Parking Spaces
